## Lonely and depressed during internship

arguewithatree   (Gorilla, 534 ) on 7/23/12 at 3:00am

I'm supposed to be doing this 6 week internship at a boutique bank starting next week, but I already feel miserable. I just moved to a new city a few days ago to start the internship, and it's so lonely. I live in a studio by myself, I'm not in a college town, I miss my friends and family, and the thought of being here alone for the next month and a half makes me want to die. It's my sophomore summer, and I thought it would be an amazing opportunity to spend 6 weeks here working and learning and just spending all my time getting ready for recruiting – but I never took account how hard it is to be productive when you're miserable as hell.

Anyone been through this before?
